Flammability Limits in Air:

Lower flammability limit: Not determined

Upper flammability limit: Not determined

5.1. Extinguishing media

Suitable extinguishing media: Foam. Water. Carbon dioxide (CO₂). Dry chemical. Preferably extinguish with alcohol-resistant foam. If alcohol-resistant foam is not available, use normal foam.

Unsuitable extinguishing media: None known

5.2. Special hazards arising from the substance or mixture:

Hazardous decomposition products: Burning produces obnoxious and toxic fumes, Aldehydes, Carbon monoxide (CO), Carbon dioxide (CO₂)

5.3. Advice for firefighters

Special protective equipment for firefighters: As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear

Fire-fighting measures: Cool containers / tanks with water spray. Water mist may be used to cool closed containers. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel:

Use personal protective equipment as required. Avoid contact with skin and eyes. Avoid dust formation. Remove all sources of ignition. Sweep up to prevent slipping hazard.

6.1.2. For emergency responders:

Use personal protection recommended in Section 8.

SECTION 7: Handling and storage**7.1. Precautions for safe handling:**

Use personal protective equipment as required. Ensure adequate ventilation. Avoid contact with skin and eyes. Low hazard for usual industrial or commercial handling. After contact with molten product, cool skin area rapidly with cold water. Do not try to remove solidified material from the skin. Do not remove clothing if adhering to skin. Avoid dust formation. May form combustible dust concentrations in air if small particles are generated during further processing, handling or by other means.

7.2. Conditions for safe storage, including any incompatibilities:

Store at temperatures not exceeding 50 °C/ 122 °F. Keep cool. No special restrictions on storage with other products.

7.3. Specific end use(s):

No data available

SECTION 8: Exposure controls/personal protection**8.1. Control parameters**

Engineering measures: Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. Provide appropriate exhaust ventilation at places where dust is formed.

8.2. Exposure controls**8.2.1. Appropriate Engineering Controls:**

Exposure limits: Not Established. This material can generate Particulates Not Otherwise Classifiable (PNOC). Eye protection: safety glasses with side-shields. Goggles

Skin and body protection: Impervious clothing

Hand protection: preventive skin protection.

Hygiene measures: Avoid contact with eyes, skin and clothing

Respiratory protection: Respirator must be worn if exposed to dust. Wear respirator with dust filter. Respiratory protection is needed if any of the exposure limits in Section 3 are exceeded. Consult an industrial hygiene professional prior to respirator selection and us. Use a positive-pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection. **WARNING:** Air purifying respirators do not protect workers in oxygen-deficient atmospheres.

Special hazard: Workers should be protected from the possibility of contact with molten material during fabrication. Contact with molten substance may cause severe burns to skin and eyes.
